

Project 1
24 hour technology experiment

Living without electricity

What are the lessons of living without electricity for 24 hours?

Your challenge is to live for 24 hours either in your house, a shelter, or outdoors for 24 hours without the use of electricity including heat, computers, phones, automobiles, or anything that depends on electricity to start it, operate it, etc.

Battery power is considered electricity (DC).

Your tasks must be as simple as possible.

Keep a journal record with the following:

Content: 1. Accountability = facts, preparation, what was in and what was out
 2. Observations = experience, epiphanies,
 3. Conclusions = sum it all up

Format: Be creative. It is up to you, as long as you address the 3 factors above in
 The final format. For example besides the traditional written, it may be
 Photographs, models, drawings, collages, etc. etc.

Objective: to understand our reliance on technology and to take note of all the things we
 take for granted, and.....propose changing our current habits and behaviors.

***This experiment by no means requires any risk of health or hazard to you or anyone in
your household.***
